

# The Egypt Exploration Society

## The Lucy Gura Archive:

Sites investigated by the EES from 1882 to 2008

The following list of sites and directors has been compiled from the Society's annual reports, published since its founding in 1882. While useful for a general overview of the sites explored over previous seasons, it is not recommended to use this without checking the published and unpublished records further. Many of the seasons of exploration covered more than one consecutive year (owing to the cooler climate in Egypt and Sudan during the winter months), and so the dates shown below are not an accurate representation of the time spent for each season's work.

The online library and archive catalogue can be accessed via:
